

Audio / Visual Specifications

The audio visual system is a state of the art, full range, high power custom system, capable of providing audio levels from subtle background music to volumes suitable for any event. All sources of input are recognized, from laptops to iPods, etc. The system has a wireless microphone as well as microphone and auxiliary inputs at four locations throughout the space; the system can be controlled through multiple zones, allowing breakout groups to have their own separate audio.

The video distribution system allows for up to eight HDMI video screens providing for multicast video, and easy connection to the audio system as well. Le Bernardin Privé can provide accommodations for any source for the video distribution system.
